SEASON 1932

Catalogue of

FRUIT TREES AND VINES

TRADE MARK

GROWN FOR SALE BY

**H. E. V. PICKSTONE & BROTHER,
LIMITED
SIMONDIUM, C.P.**

GENERAL REMARKS

It gives us great pleasure to submit our 38th Annual Catalogue. Having a good stock of our larger illustrated Catalogues in hand, we are this season issuing only a small sized one, and anyone who has not had a copy of our larger illustrated Catalogue can obtain same on application.

We have to thank our Customers for the continued support accorded to us during the last thirty-seven seasons, and we shall do our best to merit a continuance of their favour and recommendations.

Our Nurseries contain over one million trees in various stages of growth, and are annually inspected by the Government Inspectors. All trees sent out are guaranteed to be free from all insect pests and diseases.

All Fruit Trees we offer are worked solely under our personal supervision, and buds and scions are selected with great care from only the finest strains. That our customers appreciate our work along these lines is borne out by the very large and increasing business we have done. Our **Prices** will bear very favourable comparison with any of our legitimate competitors; but we at no time make a claim to produce **cheap trees**, which in the long run will prove dear trees to the grower. We have the retention of the good name of our business always before us.

Prices. Prices are clearly stated on pages 6 and 7.

Packing: All trees are most carefully packed for transmission to any part of the world, for which a moderate charge is made. For details of this charge see Price List on pages 6 and 7.

Orders: Orders may be booked at any time and executed in June, July or August. Citrus trees can be supplied nearly all the year round.

All orders are acknowledged on receipt, and should no acknowledgment be received within a reasonable time it can be assumed that the order or letter has miscarried.

Small orders are welcomed, and will receive the same care and attention that is accorded to large orders.

Alterations or Delays to orders cannot be accepted later than ten days prior to the date arranged for dispatch.

Cancellations: Cancellations of orders booked **definitely** cannot be accepted, except in cases of real necessity.

Mistakes or Errors: Clients are requested to notify us, immediately on receipt of their consignments, of any mistakes that may have occurred in their order, or any overcharge or other error in their invoices, and we will at once gladly rectify them. It is our aim to conduct our business in every way satisfactorily to those who may favour us with their confidence.

Substitution: Please fill in answers to the questions on the order forms, and if no substitution is desired, please say so.

Selection: We are well acquainted with the most suitable varieties to plant in the various districts of the Union and outside Territories, and if you do not know what to plant you cannot do better than leave the selection to us. Your confidence will not be misplaced.

Instructions for Planting: Full instructions how to plant are sent with the advice of despatch of each order.

Terms: Our terms are Nett Cash on receipt of consignment, unless otherwise arranged beforehand. Money orders should be made payable at Simonodium or Paarl.

Bankers: Standard Bank, Paarl.

Prices and conditions in this Catalogue cancel all previous notifications on these matters.

TO CLIENTS IN RHODESIA.

Customs forms are sent with advice of dispatch on the same day that the trees leave, and should be presented to the Station when the trees are called for.

Citrus Trees are permitted entry into Northern Rhodesia, but permits must first be obtained from the Director of Agriculture, Livingstone, and sent to us with the order.

TO CLIENTS IN KENYA, NYASALAND, TANGANYIKA, ETC.

Permits to import must be obtained from the Directors of Agriculture at Nairobi, Zomba or Dar-es-Salaam, and forwarded to us with the orders. Trees for Kenya and Tanganyika are shipped from Lourenco Marques, and accounts for freight and shipping charges will be rendered by the following mail. Trees for Nyasaland can be sent direct to Beira for transhipment to the Shire Highlands Railway.

Small orders can be sent by Parcels Post quite satisfactorily.

FREE DELIVERY

Conditions for Free Delivery: We are continuing our carriage-paid delivery of Fruit Trees and Vines throughout South Africa, and all clients who order 50 trees and upwards, no matter how many varieties or sizes may be included therein, will receive them invoiced at the prices as clearly stated elsewhere, at any railway station or railway road motor station in the Union, including South West Africa, Swaziland and Lourenco Marques.

To encourage planting in Northern Rhodesia and the Congo, we will for this season pay Railage on such orders to all railway stations in Rhodesia and as far as the Congo Border or Beira.

This clause does not apply to orders which have to be sent oversea. In such cases, carriage will be paid to the port of shipment; Natal orders will, however, be sent per rail.

The 50 trees or over must be sent in one consignment, otherwise they will go forward carriage to pay.

All trees sent free of railage under this Clause will be forwarded by goods train. If clients wish their trees sent by passenger train, we shall have to charge then the difference between goods and parcels rates.

Guarantee of Health and Genuineness, and Conditions of Sale

Every possible precaution is taken to prevent errors and to ensure that our trees are true to name, but it is impossible to give any guarantee, express or implied, to this effect. It is therefore an express term of every contract for the sale of trees that, in the event of any trees being found untrue to name or label, we will be liable only either to supply fresh trees in the place of those found to be untrue to name or label or to refund the purchase price of the individual trees in question and that no other or further liability for loss or damage direct or indirect, will rest on us.

We further stipulate that in cases of orders booked for delivery more than three months ahead we will not recognise any liability in the event of failure to effect delivery on the agreed upon date, if such failure be caused by the trees failing to grow to standard size owing to adverse weather or other conditions or by their delivery being rendered impossible or impracticable for any other reason.

This guarantee further ensures to clients that all Apple trees sold by us are worked on blight-proof stock and are duly worked on such stock; and again, all Vines are grafted on Phylloxera proof stock.

All trees at time of leaving our premises, are guaranteed healthy and free from Crown Galls, Insect Pests and other diseases.

TREES SENT BY PARCELS POST

UNION AND BASUTOLAND.

Under the Post Office Act clients are enabled to have their trees sent by Agricultural Parcels Post in the Union of South Africa at nominal rates. The charges are as follows:

Up to 1 $\frac{1}{4}$ lbs.	3d.
Up to 3 lbs.	6d.
Up to 6 lbs.	8d.
Up to 9 lbs.	10d.
Up to 11 lbs.	1/-

A package of 11 lbs. would contain about 20 second size trees or 12 first size.

We charge 1/- per bale for packing.

Orders for 50 or more trees by **Agricultural Parcels Post will be sent postage free** to any Post Office in the South African Union.

It will be seen that clients at a distance can get their trees in some cases cheaper by post than by rail.

We may mention that for Parcels Post orders we naturally have to select the lighter trees, so that clients obtaining their trees by post must not expect to receive as large a tree, either in first or second sizes, as they would receive were the trees sent by rail.

We therefore recommend our clients to have their trees sent by rail whenever convenient unless small trees will satisfy them.

Parcels Post is very well suited for the transportation of small orders for Citrus trees. By this method orders for Orange and Lemon trees can be sent with a considerable degree of safety quite cheaply. It should be noted that when Citrus trees are packed for post they are partially deprived of their leaves, so that when they are unpacked and planted out it is especially necessary to shade the stems either by a thick coating of whitewash or by a jacket of straw.

The above rates of postage apply only to places in the South African Union, including Basutoland but not Swaziland or South-West Africa.

BECHUANALAND.

Trees can be sent by Agricultural Parcels Post to Bechuanaland (excepting Ghanzi, Maun and Kasane) at the following rates:

Up to 3 lbs.,	1/-
Over 3 lbs. and under 7 lbs.	1/6
Over 7 lbs. and under 11 lbs.	2/-

and we will pay this postage on all orders for 50 or more trees.

PRICES—SEASON 1932

DECIDUOUS TREES

(Plant from 15th June to 15th September)

“HINTS ON FRUIT GROWING”

By H. E. V. Pickstone.

We shall be pleased to send a copy of this book in English,
free of all expense to any grower who cares for one.

We are convinced that a perusal will obviate many mistakes,
and much valuable information on all matters pertaining to the
Fruit Industry from the experience of many experts is compiled
therein. Also it contains the advertisements of many of the leading
firms who stock fruit-growers' supplies and is of considerable
value as a reference book on most matters pertaining to fruit
growing.

The ninth edition in English is now available.

The Afrikaans edition is meanwhile exhausted.

For Prices see Pages 6 and 7.

CITRUS TREES

IMPORTANT NOTICE.

Our Citrus Trees of all varieties are worked from strains personally selected by us in California many years ago, and bud selection has been systematically carried out.

This Department of our business has very largely extended. Needless to say, it is our aim to keep it up to date in every respect.

All the trees are grown in the Nursery to a single stem, and each tree is trained to a stake, and no expense is spared on them.

Frequently they are delivered long distances within the Union and also outside its borders, with a loss of less than one per cent., and there is absolutely no excuse for a planter not being able to establish with them a successful citrus grove, big or small.

BEST VARIETIES.

The varieties of Oranges listed are well known as being the best for commercial planting and general purposes. **Pickstone's Washington Navel** and **Valencia Late** stand first and can be particularly recommended. The Chief Government Fruit Inspector's books show that for Oranges exported during the season 1930, via Cape Town, the record for quality in **Navels** and **Valencias** goes to the fruit from trees supplied by us. All the Lemons listed can be relied upon as the best and most satisfactory varieties for African consumption and for export, and they have been thoroughly tested in most parts of the country. All our Citrus Trees are worked on Rough Lemon Stocks.

ORANGES

Clanwilliam	Seedling	Mediterranean	Sweet	Ruby Blood
Jaffa		Navelencia		Thompson's Improved
Joppa		Paper Rind	St. Michael	Navel.
and				

PICKSTONE'S VALENCIA LATE
PICKSTONE'S WASHINGTON NAVEL.

LEMONS

Eureka
Genoa
Villa Franca

NARTJES.

Cape Nartje
Oonshu

GRAPE FRUIT

Marsh's Seedless
Triumph

CITRONS.

Citron of Commerce.

LIMES.

Tahiti

VALUABLE TABLES

Number of trees to an acre at various distances:—

10 feet x 10 feet	435
11 feet x 11 feet	360
12 feet x 12 feet	302
13 feet x 13 feet	257
14 feet x 14 feet	222
15 feet x 15 feet	193
16 feet x 16 feet	170
17 feet x 17 feet	150
18 feet x 18 feet	134
19 feet x 19 feet	120
20 feet x 20 feet	108
21 feet x 21 feet	98
22 feet x 22 feet	94
23 feet x 23 feet	82
24 feet x 24 feet	75
25 feet x 25 feet	69
30 feet x 30 feet	48

To ascertain the number of trees or plants required for an acre: Multiply together the distance that the trees are to be set apart each way and divide this into 43,560 (the number of square feet to an acre), which will give the number required.

DISTANCE FOR PLANTING.

For orchard planting, all varieties in Catalogue, 20 feet apart each way, with the following exceptions:—

Quinces	10 feet apart
Vines,	5. feet apart

In gardens this can be varied to suit size and conditions.

THE VALUE OF PEDIGREE

In these days one hears a lot about Pedigree trees and bud selection. We have, however, practised the propagation of such trees since the establishment of our business, without any fuss, simply feeling it was our duty to our clients whose confidence we enjoyed.

The following article, written without our knowledge, gives categorical figures clearly indicating the vital factor that responsibly grown trees are the only ones that a grower who is dependent on his orchard or grove for a livelihood, can afford to plant. Particularly with Citrus trees, the strain is vital, for size, juice content, sugar acid content, and every other factor that affects price.

"An orchard record taken during this citrus season is valuable in its conclusions as to the worth of pedigree trees.

From a small grove of Navel in the Cape South-West 100 cases of choice fruit have been exported from 50 seven year old trees; the grower has alongside them a similar block of Navel, nine years old, which only cropped 15 export cases of Choice and 15 boxes of market-culls.

The marketable fruit from the seven year old trees totalled 70 market boxes, equal to another 50 export cases, so that from the 50 pedigree trees there was a total plucking equal to 100 cases exported and 50 cases marketed. This is good going for seven year old trees, and we imagine it would be hard to beat from any citrus area in this or any other country. The trees are "Pickstone's Washington" and the fruit was of the high quality which distinguishes that excellent strain, a firm orange with a high-coloured thin peel, very little pith and rag, delicate skin to the segments, and a heavy juice-content.

Against the 150 export cases shown by this plucking, the other block of fifty (nine year) trees brings up a total equal to 25 export cases. These trees were, as will be noted, two years older than the "Pickstone's Washington" block, but they were trees bought from an obscure nursery and they were planted before the grower had much knowledge of the value of the proper thing in fruit-tree strains.

On to-day's records one tree of the Pickstone strain is worth six of the others to this grower, on product alone, but taking into account ground space, cost of attention and fumigation, it is not an unsound estimate to state that one of the pedigree strain trees is worth (on a cash basis) ten of the other trees.

The returns have given the grower 30/- per tree from his fifty "Pickstone Washingtons," the other fifty show a tree return of 5/3 only.

No instance of such a striking comparison has ever come before our notice (except returns from self-sterile trees—another snag to the unwary beginner), and the comparison is not loaded with any inequalities for the two blocks are planted in similar soil and the one is alongside the other."

TESTIMONIALS

A few UNSOLICITED TESTIMONIALS received during last Season.

CAPE TOWN.—"The fruit trees I got from you a couple of years ago are such a success that I am making room for a few more."

JOHANNESBURG.—Fruit trees arrived in perfect condition and I am well satisfied.

BETHANIEN (S. W. A.)—"I obtained ten years ago citrus trees from you, which bear well."

FRANKFORT (O.F.S.)—"I ordered some years ago a number of trees which I planted on my farm, and I found them excellent."

ROSMEAD, (C.P.)—"I have now planted all the trees I had from you and some are giving leaves already. I must say its the finest lot of trees I ever had from a nursery. I now find I have some space for some more."

ELLIOT, (C.P.)—"I acknowledge receipt of the trees, which arrived in good condition. Your packing is the best I have ever seen, for the trees were still quite damp on arrival."

SPRINGS (Tvl.)—"The bale arrived in splendid condition, and the trees seemed as if only just having been taken from the ground. I must thank you for the very satisfactorily executed order."

BONNIEVALE (C.P.)—"My orange trees are coming on fine, they were quite fresh and healthy on arrival, and I wish to thank you heartily for packing the trees so nicely."

BOSKOP RAIL (Tvl.)—"The trees I got from you two years ago have done very well, and everyone is astonished at their growth."

CAPE TOWN.—"About eighteen years ago I got about 40 fruit trees from you, and recently when in Johannesburg I re-visited the place where I (a complete novice at the job) had planted them. I was told by the present owner that they had never eaten such wonderful walnuts, peaches, apricots and Satsuma plums as they have had from them."

FERREIRA (O.F.S.)—"Many thanks for the 40 trees received on the 7th inst. They arrived safely and I am highly satisfied with them."

AMANI, (Tanganyika)—"The trees were five weeks in getting here, but arrived in first class condition. I think I may lose two but the rest are doing very well indeed."

ORANGE GROVE (Tvl.)—"The peach trees I received from you in 1927 did remarkably well this year, despite the drought. The fruit was very large, well shaped, and of excellent flavour, while the crop was abundant. All my crop sold readily at top prices."

BEACONSFIELD (C.P.)—The vines arrived safe and I may say the trees I got from you last year have done remarkably well.

SALISBURY (S. Rhodesia)—“The fruit trees I received from you as per order are all doing very well, and I am very pleased with them.”

UPINGTON (C.P.)—“All the fruit trees and vines I have had from you are growing splendidly, and are admired by everyone who sees them.”

NAIVASHA (Kenya Colony)—“You will be pleased to hear that all the trees you sent us last year have done remarkably well.”

LADYBRAND (O.F.S.)—“This is just to tell you that I am very proud of the trees received from you in 1928 and 1929. I can really boast of my little orchard.”

OUTJO (S.W.A.)—“I received the trees in exceptionally good condition taking in consideration the long journey by rail and then still another 113 miles per motor. I am sure they could not have arrived in better condition, thanks to your excellent method of packing.”

OLEOLONDO (Kenya Colony)—“Will you please send me the 40 trees as per enclosed list. We had some trees from you two years ago, which arrived in perfect condition, and are now doing very well.”

IRINGA (Tanganyika)—“First I am glad to tell you that the trees I got from you in 1927 arrived in an excellent condition, and the packing was excellent—consequently they grew very well.”

WORCESTER (C.P.)—“Will you please forward me the following 200 trees. The trees I got from you for planting last year are all doing very well, I did not lose a single one.”

MOSSEL BAY (C.P.)—“The citrus trees have arrived safely, and in the condition one has learned to associate with any trees despatched from your nurseries.”

MOTITO (C.P.)—“I received the trees in good order and also wish to inform you that I received trees from several nurseries, but your trees are the best I have ever received.”

TARU JABBA, Peshawar (India)—“I am sure you will be pleased to know that the consignment of fruit trees despatched by you on the 18th July reached Peshawar on the 1st September in a wonderfully good condition, every plant in the lot of 246 being alive and likely to do well and this despite the fact that the trees underwent quarantine fumigation in tropical Bombay. I am grateful indeed for the excellence of the plants and the care bestowed in packing them for the long journey.”

PORT ELIZABETH (C.P.)—“I have to advise you that the Marsh's Seedless Grape Fruit trees arrived in very excellent condition, every tree looking very healthy that it is impossible that any losses should occur in planting.”

PIETERSBURG (Tvl.)—“The trees I ordered from you have given me the greatest satisfaction, so I am again sending you an order.”

WINDHOEK (S.W.A.)—“I am submitting a small order for Citrus trees which I trust you will execute as well as usually. I have several Washington Navel (Pickstone's) trees in my garden. They are doing exceptionally well.”

ERMELO (Tvl.)—“It may interest you to know that I have your Navel (Washington) oranges and limes here bearing full crops in this High Veld, which I ordered from you years ago. The oranges are all you claim for your navels, delicious flavour, very juicy, sweet and of large size. Your strain seems to be excellent if one is to judge by what is grown here in the Transvaal as navels.”

QUE QUE (S. Rhodesia)—“Fruit trees and vines arrived safely for which my best thanks, and am pleased to tell you that all are doing splendidly, couldn't wish for better.”

KAFUE (N. Rhodesia)—“Many thanks for the citrus trees which arrived excellently packed and in splendid condition.”

RUANDA - URUNDI (Congo Belge)—“Allow me to say that the trees, in spite of their long journey arrived in perfect condition. Of the whole 550 trees planted two months ago only 3 nartje and 9 plums failed to grow and the remainder of the trees are growing well. The time taken from departure from your orchards till arrival here was 29 days. This order having given entire satisfaction I anticipate a further order for next year.”

PARYS (O.F.S.)—“I received the trees to-day and am highly satisfied with same and they arrived in good condition.”

MIDDELBURG (Tvl.)—“The trees arrived in very good condition and I am perfectly satisfied. Some of them have already started growing. Some years ago when I was still at Carolina I also received trees from you and I am pleased to state that I was quite satisfied then too. They all grew fine and are bearing well.”

BROKEN HILL (N. Rhodesia)—“The trees landed in perfect condition and my own 150 trees have all done very well and every tree, without exception, is now in leaf.”

DOWA (Nyasaland)—“The trees all arrived in perfect condition in spite of the fact that the last four days of their journey was done by native carriers. Last year my trees were two months on the way, but even so only two nartjes and one orange tree did not survive the journey.”

DE AAR (C.P.)—“All the trees I ordered from you last year, with the exception of one, are growing most beautifully and I am highly satisfied. The one grew quite well but after a time died off, I think on account of the wind.”
